Note: For residential support, supervised living or host home/companion care services, document the discussion about resources available for room and board.

Outcome

What does the person want from this service?

: Jonathan works on folding his clothes.

Pertinent Information

Identify any needs, requests or considerations specific to this service that are necessary for the staff to know when supporting the person in achieving his or her outcomes.

Jonathan is an intelligent and friendly 38 yr. old Hispanic male who resides at 9118 Kings Cross, San Antonio, TX 78254 in a host home companion care setting with his parents, Carrie and Raul Rea. Jonathan is able to live anywhere else but chooses to continue to live at home with his family. Jonathan has his own room and able to retreat there for privacy. The home is equipped with fire extinguisher, smoke detector and fire drills will be conducted quarterly and as needed. Jonathan is able to stay home alone but for his safety he will stay home alone for at least 3 hours. Jonathan is able to dial 911 in the event of an emergency, he is able to exit the home as well. Jonathan does have a VNS device to monitor and track his seizures. Due to his dominant left side, he will lead with this and follow through with the recessive rights side of his torso and lower body. Jonathan does not feel limited with his ambulation at work. Jonathan does not require hands-on assistance unless the maneuver is complex as with stairs, escalators, stepping over barriers, etc. Jonathan can communicate his needs, wants and desires to others. Jonathan can understand, speak read and write English. Jonathan has safety awareness skills he uses while out in the community. Jonathan does not have very much difficulty in navigating his home environment. He is familiar with all areas that may present uneven flooring that he needs to be more cautious with. SPT reviewed and discussed the IDD Service Coordination contact preference form with Jonathan and his parents. SC informed Jonathan that SC must visit in person at least once every 90 days or more frequently as needed. Jonathan selected his preferred method of contact as all of the above to include in person, audio-only or audio-visual communication. Jonathan has no known allergies. Carrie Rea/HHCCP will provide assistance with scheduling and transporting Jonathan to his medical appointments as needed. Carrie Rea/HHCCP will assist with medications and refills and Jonathan is able to take his medications on his own as he has a scheduled and a box for his medications. Jonathan is very independent and is able to do most of his ADL's on his own such as bathing/showering, toileting, grooming, shaving,

dressing, and can pick out weather appropriate clothing. Jonathan uses mouthwash and flosses as well. Jonathan expresses that he flosses "once in a while," and he uses the small flossers. Previously, Jonathan has stated that sometimes flossing the back part of his teeth can be difficult, so he would like to start working on flossing more. Jonathan will help around the house with taking out the trash, mopping, vacuuming, everyday cleaning in the house, mowing the yard, do his laundry and anything else that HHCCP may need help with. Jonathan is able to cook meals at home and he will sometimes BBQ for his parents. Jonathan will need assistance with full meal preparation/cooking. HHCCP will assist as needed with household cleaning, cooking meals and laundry. Jonathan can operate appliances at home. Jonathan has informed SPT that he is not a picky eater, and he enjoys everything; he is on a "sea (see) food diet."
